

PARK CITY FENCING ACADEMY

SAFETY RULES

Fencers must wear protective clothing including long athletic pants or knickers, underarm protector, fencing jacket, glove, mask and athletic shoes. No jeans, shorts or street wear are allowed.

Female fencers must wear chest protectors. Chest protectors for male fencers are not required but are recommended for younger fencers.

Cups for male fencers are recommended.

Fencers must wear masks when refereeing fencing bouts unless allowed otherwise by the coach. During crowded times, masks must be worn on the fencing floor at all times when weapons are present.

Should a fencer need to scratch their face/adjust glasses, etc, which may require lifting of the mask while on the fencing floor, the fencer must go to a wall on the perimeter of the area and away from all other fencers, and then can lift the mask to make any necessary adjustments.

Fencers must handle the weapon so that it is tip down, or hold the weapon by the tip unless engaging a partner wearing full protective equipment.

Fencers must put their weapon down prior to taking off any other equipment.

Be sure to dry your shoes before stepping onto the fencing floor. Any residual moisture makes the floor extremely slippery and dangerous to lunging fencers.

Participants and spectators must never walk between two fencers who are engaged in a fencing activity. They should always walk in the areas at the end of the strips to go from one fencing strip to another.

Make sure you walk along the wall at the end of the strip and away from all fencing. Loitering at the side of the strip without protective equipment is prohibited.

When leaving the club, make sure to lift fencing bags over the floor cords and not drag them over cords.

I have read and agree to abide by the above safety rules.
